

Product Requirements Document (PRD)

Product Name: SmartHome Security System

1. Introduction

The SmartHome Security System is designed to provide comprehensive home security through real-t

2. Requirements

2.1 Core Functional Requirements

- **FR1:** The system shall detect motion within the designated areas of the home.
- **FR2:** The system shall send an alert to the homeowner's mobile device when motion is detected.
- **FR3:** The system shall record video footage when motion is detected.
- **FR4:** The system shall allow remote access via a mobile app.
- **FR5:** The system shall be compatible with both iOS and Android devices.
- **FR6:** The system shall support real-time video streaming.
- **FR7:** The system shall store recorded footage securely in the cloud.
- **FR8:** The system shall provide a manual alarm activation feature.

2.2 Duplicated Requirements

- **FR9:** The system shall detect unauthorized entry through door sensors.
- **FR10:** The system shall detect unauthorized entry through window sensors.
- **FR11:** The system shall detect unauthorized entry through door sensors. *(Duplicate of FR9)

2.3 Conflicting Requirements

- **FR12:** The system shall automatically disarm when the homeowner's mobile device is within
- **FR13:** The system shall remain armed at all times unless manually disarmed by the user.

*(Note: FR12 conflicts with FR13, as automatic disarming based on proximity may override manual

2.4 Noisy Notes

- **Note 1:** The system should ideally work with existing smart home devices, but this is not
-

Product Requirements Document (PRD)

-

Product Requirements Document (PRD)

Product Name: SmartHome Security System

1. Introduction

The SmartHome Security System is designed to provide comprehensive home security through real-t

2. Requirements

2.1 Core Functional Requirements

- **FR1:** The system shall detect motion within the designated areas of the home.
- **FR2:** The system shall send an alert to the homeowner's mobile device when motion is detec
- **FR3:** The system shall record video footage when motion is detected.
- **FR4:** The system shall allow remote access via a mobile app.
- **FR5:** The system shall be compatible with both iOS and Android devices.
- **FR6:** The system shall support real-time video streaming.
- **FR7:** The system shall store recorded footage securely in the cloud.
- **FR8:** The system shall provide a manual alarm activation feature.

2.2 Duplicated Requirements

- **FR9:** The system shall detect unauthorized entry through door sensors.
- **FR10:** The system shall detect unauthorized entry through window sensors.
- **FR11:** The system shall detect unauthorized entry through door sensors. *(Duplicate of FR9

2.3 Conflicting Requirements

- **FR12:** The system shall automatically disarm when the homeowner's mobile device is within
- **FR13:** The system shall remain armed at all times unless manually disarmed by the user.

*(Note: FR12 conflicts with FR13, as automatic disarming based on proximity may override manual

2.4 Noisy Notes

- **Note 1:** The system should ideally work with existing smart home devices, but this is not
- **

2.3 Conflicting Requirements

- **FR12:** The system shall automatically disarm when the homeowner's mobile device is within
- **FR13:** The system shall remain armed at all times unless manually disarmed by the user.

*(Note: FR12 conflicts with FR13, as automatic disarming based on proximity may override manual

2.4 Noisy Notes

- **Note 1:** The system should ideally work with existing smart home devices, but this is not
- **

Product Requirements Document (PRD)

Product Name: SmartHome Security System

1. Introduction

The SmartHome Security System is designed to provide comprehensive home security through real-t

2. Requirements

2.1 Core Functional Requirements

- **FR1:** The system shall detect motion within the designated areas of the home.
- **FR2:** The system shall send an alert to the homeowner's mobile device when motion is detec
- **FR3:** The system shall record video footage when motion is detected.
- **FR4:** The system shall allow remote access via a mobile app.
- **FR5:** The system shall be compatible with both iOS and Android devices.
- **FR6:** The system shall support real-time video streaming.
- **FR7:** The system shall store recorded footage securely in the cloud.
- **FR8:** The system shall provide a manual alarm activation feature.

2.2 Duplicated Requirements

- **FR9:** The system shall detect unauthorized entry through door sensors.
- **FR10:** The system shall detect unauthorized entry through window sensors.
- **FR11:** The system shall detect unauthorized entry through door sensors. *(Duplicate of FR9

2.3 Conflicting Requirements

- **FR12:** The system shall automatically disarm when the homeowner's mobile device is within
- **FR13:** The system shall remain armed at all times unless manually disarmed by the user.

*(Note: FR12 conflicts with FR13, as automatic disarming based on proximity may override manual

2.4 Noisy Notes

- **Note 1:** The system should ideally work with existing smart home devices, but this is not
- **

Product Requirements Document (PRD)

Product Name: SmartHome Security System
